Skills

- React.js, Redux;
- GraphQL, Apollo GraphQL;
- CSS, SCSS, SASS, Styled-components, CSS Grid Layout;
- JavaScript ES6/ES7/ES8/ES9/ES10;
- HTML5, HTML;
- Node.js, RESTful WebServices;
- Trello;
- Git;
- Docker;
- Figma;
- MongoDB, ;
- Ant Design, Material-UI;
- Next.js;
- TypeScript;
- Webpack;

Selected Project experience

June 2021 - January 2022 *Front-End Engineer*
Freelance
App for collecting and analyzing various data from devices
- *Created architecture app*
- *Developed project UI Kit with reusable and encapsulated components. Some of them with high complexity.*
- *Created GraphQL requests, mutations and resolvers*
- *Developed SPA routing via react-router*
- *Works with React\Apollo at the client app*
- *Works with tables export to pdf, xlsx*
- *Works with sync browser tabs*
- *Works with user inactivity*

Technology stack: *React, Redux, TypeScript, Apollo, GraphQL, Material-UI, SCSS, Webpack, React Testing Library.*

March 2021 - May 2021 *Front-End Engineer*
Freelance
Frontend app (car`s shop)
- *Developed architecture several pages.*
- *Developed project UI Kit with reusable and encapsulated components. Some of them with high complexity.*
- *Developed SPA routing via react-router*

Technology stack: *Enzyme, React, JavaScript, SCSS, Webpack.*

Jule 2020 - March 2021 *Full Stack Engineer*
Freelance
Fullstack application providing a platform for online school (corporate network)

- *Created architecture app, front-end and back-end.*
- *Created GraphQL server on TypeScript use HTTP-Only Cookies for Authentication*
- *Created GraphQL requests, mutations and resolvers*
- *Developed SPA routing via react-router*
- *Works with React\Apollo at the client app*
- *Lead front-end team*

Technology stack: *React, Enzyme, TypeScript, Redux, Apollo, GraphQL, MongoDB, Material-UI, Docker, SCSS, Webpack.*

February 2020 - June 2020 *Front-End Engineer*
Freelance
App for checking various specifications
- *Developed charts and tables to show performance about each check.*
- *Developed project UI Kit with reusable and encapsulated components. Some of them with high complexity.*
- *Collected and formed data from back-end to front-end needs.*

Technology stack: *Next.js, TypeScript, Enzyme, Ant-Design, SCSS, Firebase, Chart.js, Webpack.*

November 2019 - January 2020 *Front-End Engineer*
Freelance
App for learning language
- *Collected and formed data from back-end to front-end needs.*
- *Developed 2 games using classes. One of them is a game that uses a microphone.*
- *Developed SPA routing.*

Technology stack: *React, Redux, JavaScript, Enzyme, Material-UI, SCSS, Webpack.*

June 2019 - October 2019 *Software Engineer*
Freelance
App for management
- *Developed scripts to search for tenders, by keywords on icetrade.by and goszakupki.by, with notification via telegram.*
- *Developed forms for filling in related tables and calculations to optimize document flow.*
- *Developed calculator for accounting cars and fuel.*
- *Developed automatic mailing to customers.*

Technology stack: *JavaScript, Jest, SCSS, Materialize CSS.*

Education

January 2020 - August 2020 – **RSS School**
Course: [JavaScript](#)

August 2020 - October 2020 – **RSS School**
Course: [React](#)

2009 - 2014 **– Faculty of Applied Mathematics - Moscow, Russia**
Qualification: mathematician. Specialty: Cryptography.

Additional Information

Portfolio: https://sam-shpakov.github.io/

Professional interests: Professional and personal development and problem solving are my two passions. From work I want to get the opportunity to study new technologies and apply them in practice. Learn from the best.
